

Simple, transparent pricing

Standard Tier	Premium Tier
Free forever	£4.99 per month Including taxes and fees
Direct data access & inverter control	Everything on the standard tier, plus:
Android and iOS	Web Portal, Android, and iOS
Local access only - requires your mobile being on the same network as your inverter (i.e., at home in most cases)	Access and control from anywhere
Basic manual scheduling of charge and export slots, for those who want a hands-on approach	Option to automatically optimise your equipment to save on your energy bill, based on your tariff, solar and consumption
Firmware updates, where available	Unlimited fair-use API access, allowing integration with 3 rd parties like PowerDog, Axle, Wonderwatt and others
View current power flow	View historic power flow graphs
View battery state of charge	Manage all systems linked to your account
View meter totals - daily and all-time	Visualise historic data and graphs since your install date
Remote EV charger control, and some other hardware that does not fully support local access, until local control becomes available	Reports
Relies on support from Premium Tier subscribers for funding	Supports the continued existence and development of software for all users

What GivEnergy Premium does

GivEnergy software helps you **save money on your energy bills** by:

- Charging your battery when electricity is cheap
- Using stored energy when electricity is more expensive
- Automatically optimising your usage based on tariffs, solar generation, and consumption

Basic scheduling remains available for free.

Our simulations — and similar services built on the GivEnergy platform — show that optimisation tools can often **offset the cost of the subscription**, and in many cases deliver additional savings.

However, savings will depend on your:

- Energy usage patterns
- Tariff from your energy supplier
- System configuration

Billing & Subscription

- Billed **monthly in advance**
- Your subscription runs from the day you subscribe to the same date the following month
- Automatically renews each month
- Cancel anytime - access continues until the end of your billing period

Promotions & Discounts

We may offer promotions from time to time, including:

- Introductory or limited-time free access
- Discounted subscriptions
- Free access for eligible organisations (e.g. registered charities, subject to approval)

All promotions are **offered at our discretion** and may be modified or withdrawn at any time.

International pricing

GivEnergy Premium is available globally.

- You will pay the equivalent of **£4.99/month in your local currency**
- All taxes, foreign exchange, and payment fees are included
- If payment is not yet available in your country, we may provide temporary free access until it is

Do I need Premium?

No. If you only need:

- Basic monitoring
- Manual control while at home

You can continue using the **free Standard Tier**

If you want:

- Remote access
- Automation
- Insights and optimisation

Premium is designed to deliver value beyond its cost

Why is there a subscription?

GivEnergy software relies on cloud infrastructure to provide:

- Remote access
- Data storage and analytics
- Automation and optimisation services

These services have ongoing costs. The subscription ensures the platform can continue to operate and improve over time.

Hardware, warranties, and support

- GivEnergy Premium relates to **software services only**
- It does **not include warranties or support**
- Your hardware will continue to function without a subscription

Commercial users

Commercial and large-scale systems may require a different pricing model.

If this applies to you, please email, with “Commercial Premium” in the subject line: premium@givenergy.co.uk

We aim to respond within 2 weeks.

Getting started

You can subscribe at any time.

After subscribing, you will receive access to GivEnergy Premium immediately.
